Business (951) 500-7979

Summary:

Professionally Registered Civil Engineer (C 54485) with over 25 years of experience managing some of the largest heavy highway projects in Southern California.

Experience:

Resident Engineer/Structure Rep – Manage and oversee construction administration and management activities of the Client's construction projects. Supervise and assign the activities of staff and consultants, review construction progress payments, costs, budgets, and schedules, enforce contract requirements and negotiate change orders.

Estimator – Responsible for activities related to estimating all elements of project cost, including labor, materials, supplies, and construction equipment. Rental and operating costs, contingency escalation, and program risk. Primary responsibilities include:

- Determining project order and magnitude, pricing change orders.
- Prepare equipment and material take-offs.
- Prepare project estimates.
- Establish and maintain cost databases.
- Assist in the evaluation of business opportunities and potential profitability.

Senior Project Manager – Fully responsible for the overall operation of a project to include the safety and well being of the company's employees, safeguarding company funds and property. Complete projects to the satisfaction of the client, consistent with cost, schedule and contractual requirements. Primary responsibilities included:

- Demonstrate strong interpersonal skills (eg. conflict resolution, and team builder).
- Ensure plans and specifications are monitored and requirements are enforced.
- Manage project risk.
- Manage the owner.
- Manage cost and schedule.
- Schedule and manage subcontractors

Scheduling – Developed and maintained project schedules using Primavera P6 scheduling software.
