Subject: RE: Water Source for Caltrans Project in and near Stockton (EA 10-1E1001)

Good morning Thoa,

California Water Service Company does not have any non-potable or potable water sources in the Walnut Grove area. We only have potable water sources located in approximately half of the Stockton area. I believe it is possible to get potable water from our Company as long as your project is within our service area and the water is being used in our area. You would need to rent a fire hydrant meter from us and let us know which fire hydrant you are pulling water from within our service area.

Hope this answers your question,

Thanks,

Stacie

Subject: Water Source for Caltrans Project in and near Stockton (EA 10-1E1001)

Good morning Stacie,

My name is Thoa Tabada and I am working for Caltrans District 10 in Stockton. In the effort of conserving water in the State, we have been directed to provide each of our projects a non-potable

and/or potable water source for the contractor to be used during construction. We have a bridge maintenance project in San Joaquin County in and near Stockton on Route 4 from Route 4/5 Connector Undercrossing to E Street Overcrossing and on Route 5 from Taylor Street Overhead to Walnut Grove Road Undercrossing.

10-SJ-4&5-PM R16.0/R18.5, PM 25.8/47.6

The purpose for this project is to treat bridge decks with methacrylate, install galvanic anodes to bridge columns, remove and replace joint seals.

Can you please let me know if CalWater has either non-potable and potable water available for the construction in Summer 2016?

Thank you so much for your time and please contact me if you have any questions.

Thoa Tabada,

Re: Water Source for Caltrans Project in and near Lodi & Thornton (EA 10-1E1001)

San Joaquin County has potable water available at two locations that might meet your needs:

1. I-5 & SR12 (County Service Area 31)
2. I-5 & Walnut Grove Rd (County Service Area 12)

The procedures for obtaining water from either of these districts is outlined on the attached application form.

I can be contacted for any questions.

Subject: Water Source for Caltrans Project in and near Stockton (EA 10-1E1001)

Hello,

My name is Thoa Tabada and I am working for Caltrans District 10 in Stockton. In the effort of conserving water in the State, we have been directed to provide each of our projects a non-potable and/or potable water source for the contractor to be used during construction. We have a bridge maintenance project in San Joaquin County in and near Stockton on Route 4 and Route 5 at various locations.

10-SJ-4&5-PM Var

The purpose for this project is to treat bridge decks with methacrylate, install galvanic anodes to bridge columns, remove and replace joint seals.

We already has a water supply for construction within Stockton area, but some of our locations are within and North of Lodi area on Interstate 5. Can you please let me know if San Joaquin has either non-potable and/or potable water available for the construction in Summer 2016?

Please see attached for the project locations and the Caltrans Directive and Water Usage Guidance. If the source is available, the contractor will contact your district to set up their own account for water usage if they decide to use water from your district.

Thank you so much for your time and please contact me if you have any questions.

Thoa Tabada
