SUBJECT: I-805 at E. Palomar Street DAR and Park & Ride;
Will Serve Letter

Dear Mr. Mah:

Otay Water District (District) has the water storage capacity to serve the I-805 at E. Palomar Street DAR and Park & Ride (Project). The District anticipates the ability to supply recycled water to meet this proposed Project as described within the approved plans for d0566-090121 and d0566-060072.

Water availability is subject to all District requirements in effect at this time of application. You are strongly encouraged to adopt water conservation measures throughout the development. In response to Governor Brown's declaration of a state-wide drought calling on all Californians to save water, the District has declared a Level 1 – Supply Watch Condition.

Prior to the purchase of any meter(s), irrigation plans must be: (1) designed to District Water Agency Standards for reclaimed standards/specifications, and (2) submitted to the District and the County Department of Environmental Health for plan check and approval. The developer must contact the District for further requirements.

Each service must have an approved R/P Backflow Device purchased and installed by the owner. The fire service line will not be allowed to be connected to any buildings; the line will be intended for fire services purposes only. Failure to comply with this request will result in violation of the District's Code of Ordinances and will be subject to penalties determined by the District. The applicant should contact the Project's fire agency for any fire protection requirements.

The District's Engineering Public Services Division can be contacted at (619) 670-2241, or visit the website at www.otaywater.gov, for further requirements regarding inspection services, water main extensions, service laterals, backflow devices, and/or meter costs, and any other conditions that may have arisen since this letter was written for this Project.

Sincerely,
OTAY WATER DISTRICT

Dan Martin, P.E.
Engineering Manager
