

**11.5.6 Resistance Factors**

Revise the 1<sup>st</sup> paragraph as follows:

Resistance factors for geotechnical design of foundations are specified in Tables 10.5.5.2.2-1 through 10.5.5.2.4-1-3 and Table 1.

If methods other than those prescribed in these Specifications are used to estimate resistance, the resistance factors chosen shall provide the same reliability as those given in Tables 10.5.5.2.2-1, 10.5.5.2.4-1-3.

Revise Table 1 as follows:

**Table 11.5.6-1 Resistance Factors for Permanent Retaining Walls.**

WALL-TYPE AND CONDITION	RESISTANCE FACTOR
<u>Abutments and Conventional Retaining Walls</u>	
<u>Bearing resistance of vertical elements</u>	<u>Article 10.5 applies</u>
<u>Nongravity Cantilevered and Anchored Walls</u>	
<u>Bearing resistance of vertical elements</u>	<u>Article 10.5 applies</u>
<u>Passive resistance of vertical elements</u>	1.00

(remainder of Table is unchanged)

**11.6 ABUTMENTS AND CONVENTIONAL  
RETAINING WALLS**

**11.6.1 General Considerations**

**11.6.2 Movement and Stability at the Service  
Limit State**

**11.6.2.1 Abutments**

The provisions of Articles 10.6.2, 10.7.2, 10.8.2, and 11.5.2 shall apply as applicable.
