Meetings in Sacramento, Long Beach, Stockton, Oakland, San Diego, Webinar, Sacramento, San Bernardino, Sacramento (May 14)

Relationship to National Freight Advisory Committee

Proposed Primary Freight Network

Draft posted in Federal Register November 18, 2013.

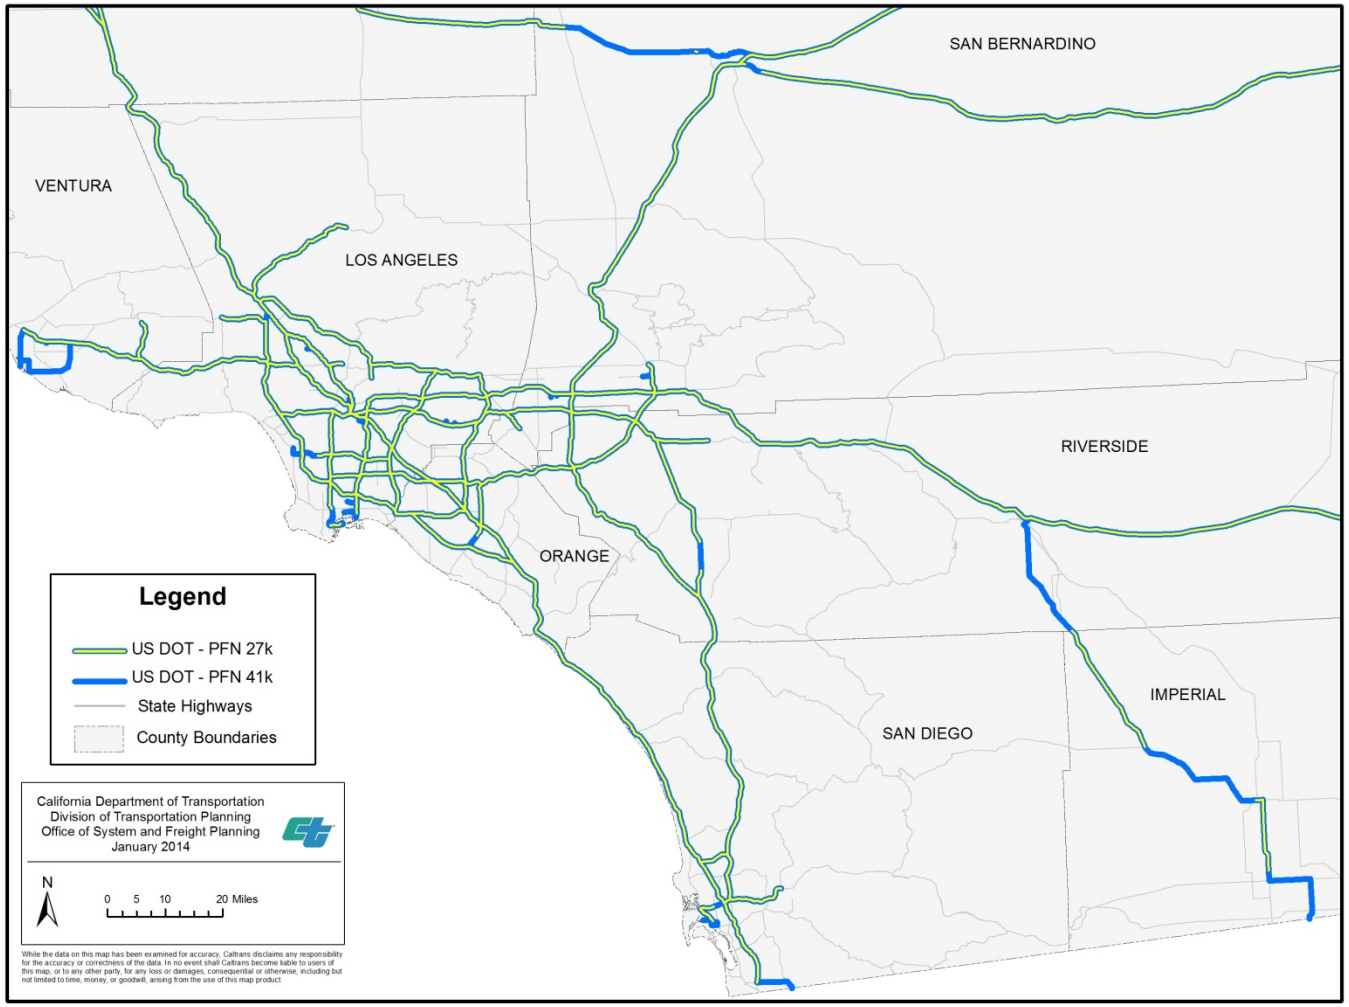
27,000 centerline highway mile system, with possibility of additional 3,000 miles by U.S. DOT Secretary.

California received 2,700 + miles on proposed system, very similar to Caltrans recommendation.

Comment letter from CalSTA Secretary Brian Kelly submitted to Federal Register on February 14, 2014.

Draft US DOT Primary Freight Network (PFN)

Draft US DOT Primary Freight Network (PFN)
Southern California



PFN Comment Letter

- Expand the proposed 27,000 centerline miles.
- Close critical first and last mile gaps, possibly using Secretary's authority to add 3,000 miles.
- Provide flexibility to adjust the PFN based on state and local knowledge.
- Include all freight modes – not just highways.
- Create a national freight funding program.
- Address environmental and community impacts.

Major distress prioritizes the distressed pavement lane miles in critical condition for rehabilitation. They are remedied by projects requiring extensive repairs that usually improve the pavement's structural condition. Those locations with minor distress are in satisfactory condition for CAPM work and use surface treatments. Projects with acceptable ride and no distress with priority greater than 14 and less than 98 are maintenance projects.

Draft California National Freight Policy Recommendations

Support California's status as U.S. international trade leader and enormous investments being made at all levels in the State to further improve the State's freight system.

Create a dedicated federal freight funding program while retaining freight's eligibility for other funds.

Address impacts to communities and environment as part of federal freight program.

Expand Primary Freight Network and make it multi-modal.
